Response to Amendment

This Office Action is in response to Amendment filed on 06/21/2005.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U. S. C. § 102 (b) as being anticipated by U.S. Patent No. 5,236,894 to Tanaka et al.

Claim 1 is rejected for the same reason as set forth in the previous Office Action.

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7 are rejected under 35 U.S.C. 103 (a) as being unpatentable over U.S. Patent No. 5,236,894 to Tanaka et al. in view of the remark.

Claims 3-7 are rejected for the same reason as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed 6/21/05 have been fully considered but they are not persuasive.

Applicant argues that the prior art (Tanaka) does not teach the group IIIb element of the present claim 1, as seen in present claim 3, is the group that includes B, Al, Ga, In, etc. This argument is not convincing, especially since the term an element from group IIa, an element from group IIb and an element from group IIIb in claim 1 are broad terms as described in present claim 3 that includes B, Al, Ga, In, etc. and also includes Sc, Y, or lanthanoid series elements in Tanaka's claims 7-9.

Therefore, for the above reason, it is believed that the rejection should be sustained. Feature of an invention not found in the claims can be given no patentable weight in distinguishing the claimed invention over the prior art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
